### BundesBauBlatt

Clarity, reliability and credibility: the **BundesBauBlatt** is the brand for the housing industry. Under the editorship of the Federal Building Ministry, which, however, only supports us in an idealistic way, the **BundesBauBlatt** has been the must-read for all local authorities in Germany for more than 70 years. With this readership and our complete journalistic independence, we have achieved a truly unique selling point. The **BundesBauBlatt** also reaches all decision-makers in housing companies and associations. We regularly provide board members, managing directors and executives with important information for their day-to-day work through our magazine issues, our website and our e-paper version. We always look at events from the perspective of all stakeholders.

### Video advertorials that will convince you!

Moving images attract attention. Content and products can be presented in a more lively and emotional way, making them easier to perceive.

In contrast to classic commercials, video advertorials convey information, tips or stories that appear valuable to the viewer while subtly promoting a product, service or brand.

The focus is often on providing the audience with useful content while raising awareness of the advertised brand, without the advertising taking center stage.

Bauverlag not only has access to the target group, but also the expertise to implement an individual storyline perfectly and tailor-made for the customer in the construction industry. The Bauverlag brands also provide neutrality and credibility for your communication goals.
